INTRODUCING **HEDGEFUND** THE FUTURE OF CRYPTO INVESTING

At **HEDGEFUND**, we believe that decentralized finance (Defi) is the future of investing

The ultimate multichain reward token volume generator with passive income built into the token. **Each holder of Hedge Fund is rewarded with 10% of all buys and sells with USDC.**

Hedge Fund launches on different chains will generate increased volume to existing projects as portions of the presale are used to buy existing Hedge Fund Projects.

MISSION

Our mission is to deliver the best possible returns to our investors while making the world of investing more accessible and transparent.

We will launch additional Hedge Fund Features that will offer percentage of rewards in the specific projects tokens which will generate significant amount of volume for each individual project while continually increasing the value of Hedge Fund tokens.

UTILITIES

Hedge Fund is a project with true utility with a portfolio of established/trusted projects on multiple blockchains in which rewards are paid in each specific Hedge Fund Projects tokens in addition to USDC rewards. Having multiple blockchains allows arbitrage opportunities between blockchains and endless future possibilities. Arbitrage between Hedge Fund projects will create volume which in turn increases continuous rewards.

Hedge Fund has a special feature built into the contract so that 3% of every buy and sell transaction is sent to the liquidity pool. This provides added safety and security to all holders looking to profit from their investment in the short and long term.
